Prefab Modular Container house

CONTAINER

HOUSL

Prefab Modular Foldable Container House Model.GLDZD

Main features and Advantage

Mobility: Foldable container houses are designed to be flexible, easily folded and unfolded, making them suitable for temporary or mobile needs such as camping and exhibitions

High Space Efficiency: These houses maximize space utilization, providing relatively large living space when unfolded, and occupying a smaller volume when folded, creating more functional areas within limited space.

- Cost-Effective: Foldable container houses are often cost-effective, reducing transportation and construction costs. Additionally, their reusability can lead to long-term cost savings.
- **Quick Assembly:**Compared to traditional buildings, foldable container houses can be assembled more quickly. This is advantageous for emergency situations, temporary use, or rapid construction projects.
- Environmentally Friendly: Manufacturing these houses can involve using recycled shipping containers, reducing the demand for natural resources. Furthermore, their reusability helps minimize overall waste.
- Versatility: The design of foldable container houses allows for customization based on specific needs, making them suitable for various purposes such as residential, office, retail, exhibition, etc.
- Durability: Shipping containers, used as the base material, possess strong structural integrity and durability, resulting in a longer lifespan for foldable container houses.
- Modern Aesthetics: The design of foldable container houses often exudes a modern and innovative aesthetic, appealing to those who appreciate contemporary architectural styles.

It's important to note that foldable container houses may also face challenges such as insulation and soundproofing issues, so a comprehensive evaluation of various factors is necessary for practical applications.

Wall panel	50/65mm EPS/rock wool/glass wool sa
Steel structure	1.5mm thick steel
Windows	PVC/Aluminum alloy double-layer slidi
Exterior door	High-end steel security doors/roller sh
Interior door	Steel/wood
Sub-floor	18mm MGO/Fiber cement block/ceme
Surface floor	Wood/PVC vinyl floor
Bathroom	Integrated with toilet and shower
Water pipe	PPR and PVC water supply and draina
Electricity system	Switch,socket,lamp light,waterproof sc
Accessories	Paint,glass cement,floor nail,blind rive
Loading quantity	12 sets/40HQ or 10 sets/40HQ

Prefab Modular Flat pack foldable Container House

Convenient Portability and Transportation: Flat pack container houses can be folded into a smaller volume for easy carrying and transportation. This makes them particularly suitable for hard-to-reach or temporary locations, such as remote areas or disaster-stricken areas

Cost-Efficiency: Due to their compact nature during manufacturing and transportation, Flat pack foldable container houses tend to have lower associated costs. Additionally, using shipping containers as building materials can reduce construction expenses

Quick Assembly: Flat pack Foldable container houses are designed to be guickly assembled and disassembled, making them an ideal choice for situations that require rapid construction or relocation

Environmentally Friendly:Repurposing discarded shipping containers for construction helps reduce the demand for new materials, contributing to resource conservation. Some foldable container houses integrate renewable energy sources and efficient energy systems, enhancing energy efficiency

Flexibility: These houses can be designed in various shapes and sizes to meet different spatial requirements. They can also be easily modified and expanded, providing greater flexibility

Durability:Shipping containers are typically made of sturdy steel, offering durability and resistance to harsh weather conditions. This ensures that foldable container houses remain stable in various climates.

Unique Design:The unique design of Flat pack foldable container houses often attracts attention. Their innovative appearance adds a modern touch, making them suitable for various architectural purposes

It's important to note that Flat pack container house it's better in outter apprearance that other foldable container houses ,especially it can be stacked to duplex or 3 stories ,creative design is it's outsanding advange
